## Twin Cities largest engineering firms, 2026

### Ranked by Registered engineers

Locally Researched by: Ethan Nelson, Minneapolis / St. Paul Business Journal

The largest engineering firms in the Twin Cities employ hundreds of local licensed engineers in the Twin Cities.

The online version of this ranking expands beyond what appears in print; another 11 engineering firms are included in our digital rankings, in addition to the 40 featured in this week's print edition.

This week's List is a continuation in a shift in our research methodology and philosophy in 2026, one that emphasizes more data and context for readers while better coordinating the resources available to us and our 46 sister publications under the American City Business Journals flag. This effort has identified thousands of new local records — and cumulatively, tens of thousands of new businesses across ACBJ's footprint — this and last year alone.

Information on The List was obtained through MSPBJ research or supplied by individual firms through questionnaires that MSPBJ could not independently verify. In case of ties, firms are ranked by total employment and then listed alphabetically if ties remain. Additionally, companies that did not respond to employment surveys but were still included on this year's List are sorted by estimated total employment figures derived from MSPBJ archives; annual filings with the U.S. Department of Labor; and other firm-specific resources. Inclusion on this year's List required each firm to have a minimum of 500 total employees, using the methodologies described above.

For information about this and other MSPBJ Lists, please contact Data Reporter Ethan Nelson at [enelson@bizjournals.com](mailto:enelson@bizjournals.com) or 612-288-2105.
